Narellan Town Centre Architect: The Buchan Group Installer: Keystone Linings Product: Ecolite beams faced with Sublime Teak

Gen-Eco offer a wide variety of options for use in Shopping Centres. With the broad choice of materials and processing options available we can provide solutions for entry ways, food court ceilings and seating and external soffit linings.

Selections can be made from the following:

- Ecolite beams and panels
- Creative Imagery on fibre cement panels to meet Non-Combustible regulations
- Bendy plywood to produce striking waves and forms

BEFORE & AFTER

Bendy plywood used to construct seating structures at Westfield Chermside QLD. The plywood was used to create the circular shapes but once finished the plywood is no longer visible. Above during construction, right the finished seating structure.

At Gen-Eco we are continually being inspired by our architect and shop-fitting clients to provide solutions and in most cases we are able to meet their requests.

As our product offer is so diverse, we can provide unique solutions across a broad range of surface options and substrates.

Toombul Shopping Centre—QLD

Builder: Mainbrace Installer: Farrago Interiors

Product: 75mm thick Ecolite beams in Cedar imagery
